

ENVIRONMENTAL POLICY

This Environmental Policy relates to Power Logistics Services Limited where the scope of service delivery is defined as 'the provision of temporary power for events'.

Power Logistics Services expresses a commitment to the understanding, the monitoring and the improvement of the impact of company activity in relation to environmental pollution, the carbon footprint and the overall environmental impact.

We identify environmental aspects of all activity underpinning the delivery of service. We determine those that have or can have significant impact on the environment. It establishes an Environmental Management System (EMS) with a framework, which is based on the identified aspects.

We commit to comply with all legal requirements as documented in ISO 14001:2015

Where project requirements are complex and fluid, we empower our clients with innovative environmentally friendly interventions.

Our Environmental policy is centred around the requirement to evidently and progressively reduce any adverse impact on the environment.

We do not stand still. We measure, analyse and improve. We strive to be the best in our industry.
